Research Methodology and IPR

Presented on:

“OWNERSHIP OF COPYRIGHT AND COPYRIGHTS OF THE AUTHOR”

Under the Guidance of:

Prof.Megha.G

Research Methodology &IPR,
Department of Electronics and
Communication Engineering.

Presented by:

Subramanya C 1AT23EC162

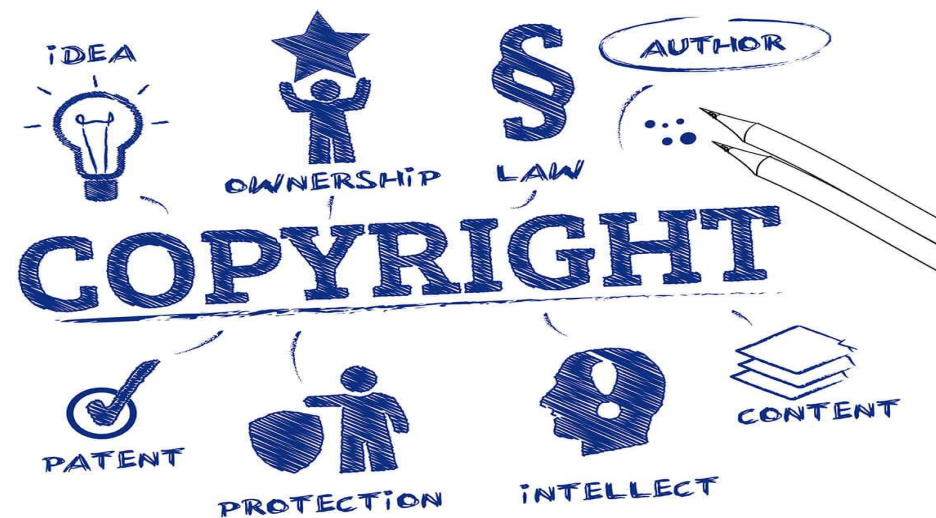

INTRODUCTION

- >Copyright ownership refers to the exclusive rights granted to creators of original works, such as literature, music, art
- >Ownership of copyright means the person who has this right can decide who can copy, distribute, or use the work.
- >Usually, the creator or author of the work is the first owner of the copyright.
- >The owner can sell, license, or give permission to others to use the work.

OWNERSHIP OF COPYRIGHT

- >Ownership of copyright means the legal right to control how a creative work is used.
- >Usually, the creator or author of the work is the first owner of the copyright.
- >The owner has the exclusive rights to reproduce, distribute, publish, or adapt the work.
- >However, in some cases, the ownership may belong to employers, producers, or organizations if the work is created under a contract or during employment.

- >The copyright owner can also transfer or license their rights to others, allowing them to use the work with permission.
- >Overall, ownership of copyright protects the creator's economic interests and ensures that others cannot use the work without authorization.

COPYRIGHTS OF THE AUTHOR

- >Copyrights of the author are the legal rights given to the person who creates an original work like a book, song, film, or painting.
- >The author automatically becomes the first owner of copyright as soon as the work is created. These rights allow the author to reproduce, publish, distribute, perform, translate, or adapt their work.
- >The author can also license or transfer these rights to others for money or permission.

>Even after transferring rights, the author keeps moral rights, such as being recognized as the creator and preventing misuse or distortion of their work.

CONCLUSION

In conclusion, ownership of copyright and copyrights of the author protect the creator's original work from being used without permission. They give the author the right to control, use, and earn from their creation.

THANK YOU
